

## Digital Airspeed ASP-621

## Digital Altimeter ALT-621

### Drop-In Replacement for Mechanical Instruments

These instruments were designed to replace analog instruments in air data, pitot-static test boxes. They have the hole pattern, shape and size of standard instruments, making them an ideal replacement and upgrade from the mechanical indicators that are so easily damaged.

The ALT-621 and ASP-621 operate on 12 volts DC, using a common wall-type transformer, or battery. No special power supply is required.

**Go digital. Go precision. Upgrade your tester today!**

#### Features:

- Backlit display enables nighttime use
- Leak check tracks leakage and time simultaneously
- Leak check timing is selectable from 30 seconds to 2 minutes
- Digital transducer technology provides high reliability, accuracy, and resistance to damage
- Altimeter also measures inHg and mBar

**ASP-621-650 \$1250.00**  
**ASP-621-350 \$995.00**

**ALT-621-50 \$1250.00**  
**ALT-621-35 \$995.00**

Note: The ALT-612 does NOT have the precision required to test RVSM altimeter systems.
